

# Melpool PAC

Description	Use	Specifications
<p>Instructions for use:</p> <ul style="list-style-type: none"><li>• Once or twice a week 50 ml or several times a week 10 ml per 10 m<sup>3</sup> of water</li><li>• In case of very cloudy water, double/triple the dose. Dose a maximum of 100 ml per 10 m<sup>3</sup> of water</li><li>• Dissolve the product in a bucket of water and distribute evenly over the surface of the water</li><li>• Suspended particles will quickly form flakes and settle in the (sand) filter or settle on the bottom of the pool</li><li>• During the treatment, the pump must be running for at least 3 to 4 hours. Then rinse the (sand) filter thoroughly</li><li>• Sediment can be removed from the bottom with the help of a pool vacuum cleaner or pool robot</li><li>• It is not recommended to use the swimming pool during the flocculation process</li><li>• pH value should be maintained between 7.2 and 7.6</li></ul> <p>Note: Do not dose too much! An overdose causes the opposite effect (clouding). Not recommended for use with cartridge/cartridge filters. These can clog or slam shut.</p> <p>Warning:</p>
