

ONE PARTNER FOR THE WHOLE GARDEN

THE FULL SOLUTION

Pump, filtration, pipework, drip line, sprinklers, valves and controllers all sit in the same range. Nothing is missing when the van is loaded, and nothing has to be chased from a second supplier.

WE PLAN IT WITH YOU

Full system design, product supply and technical support, for projects of any size. Give us the flow, the pressure and the additive; we come back with a drawing of the project, a sized system and a complete parts list.

ONE ORDER, ONE INVOICE

One account covers the lot, delivered together from our European distribution centres, on a single invoice. Free shipping on orders over € 350.

CONTACT US, LET'S MAKE IT HAPPEN

Whatever the size or complexity of your project, we're here to help. From the first idea to the final delivery, bevo is your partner for the complete irrigation solution.

-  **SOURCE**
Mains, tank or rainwater
-  **PRESSURE**
Pumps and boosters
-  **FILTER**
Clean water to the pump
-  **DOSE**
MixRite LF-1000
-  **DISTRIBUTE**
PE and PVC pipework
-  **APPLY**
Drip line and sprinklers
-  **CONTROL**
Valves and controllers

MIXRITE LF-1000 HELPS YOUR GARDEN GROW

A quiet, precise & reliable dosing pump tailored to meet the needs of home gardens.

WHAT PRECISE DOSING CHANGES

An even, flourishing garden

Plants receive the right blend of nutrients and additives consistently, which shows as uniform growth rather than patchy results.

Less product used, less wasted

Additives are metered to the water actually flowing, so nothing is mixed by guesswork and nothing is poured away afterwards.

Feeding without the routine

The pump runs whenever irrigation runs. Feeding stops being a separate job on the garden calendar.

A THRIVING GARDEN FED THROUGH THE WATER

UPGRADE ANY GARDENING EXPERIENCE WITH A PUMP RENOWNED
FOR ITS WHISPER-QUIET OPERATION AND UNWAVERING RELIABILITY.

The MixRite™ LF-1000 is a hydraulic dosing pump built for the low flow rates found in gardens. It delivers plants exactly what they need for growth through the irrigation system — no electricity required. Fertilisers, plant protection products and other water-soluble additives go in at a set ratio, with less waste.

ENGINEERED FOR GARDENS

- ✓ **QUIET OPERATION**
The pump is known for whisper-quiet running — which matters when it sits next to a terrace or a house wall.
- ✓ **HYDRAULIC, VOLUMETRIC, NON-ELECTRIC**
Driven by the water itself. No supply to lay, nothing to switch on, nothing to programme.
- ✓ **EASY TO INSTALL, OPERATE AND MAINTAIN**
Straightforward to fit into an existing line and undemanding in service — patented technology inside a housing built for outdoor use.
- ✓ **LOW FLOW RATE, MADE FOR GARDENS**
Works from 10 l/h up to 1,000 l/h, the range a domestic garden system actually runs at.
- ✓ **EXCELLENT REPEATABILITY AND PRECISION**
The same quantity of additive reaches the plants on every cycle, giving even growth across the garden.

INTRODUCING MIXRITE LF-1000

TECHNICAL INFORMATION

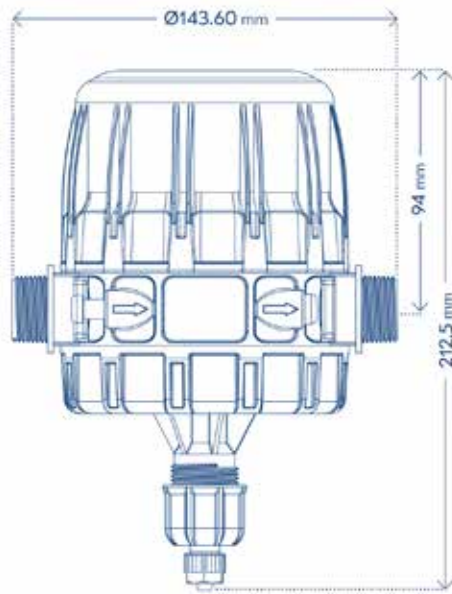

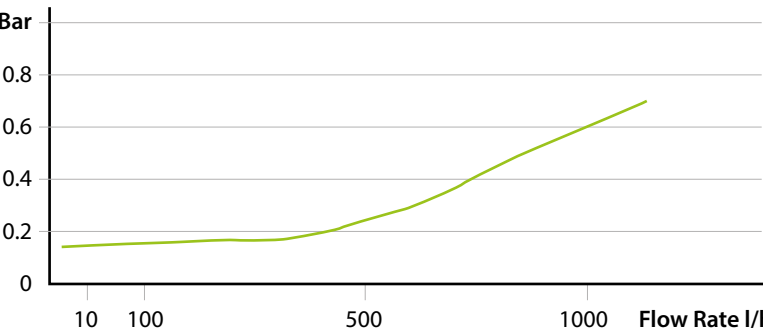

Dosing Rate	0.2 % fixed (1:500)
Water Pressure	0.2 – 8 bar
Flow Rate	10 – 1,000 l/h
Injection rate per hour	0.02 – 2 l/h
Working Temperature	4 - 40°C
Coupling	3/4" BSPT
Suction tube diameter	8 mm
Min-Max Injection Rate Per Hour	0.02-2 l/h
Operating principle	hydraulic, volumetric
Dimensions	Ø 143.6 × 212.5 mm

ALSO FOR GARDENS

MixRite 2.5 Gardening
0.2 % fixed · 10 – 2,500 l/h
compact, domestic and institutional use
