

STEP 3

CHOOSE ASSEMBLY KIT

To make installation as easy as possible for you, we have put together special installation kits. The following kits are available for each water treatment method: **Basic, Pro, Standard, Pro+**.

Itemnr	Name	BOM	List price
7043605	Assemble kit pH chlorine Basic	<ul style="list-style-type: none"> 1x Norsup 5in1 Probeholder set 2x Saddleclamp 50x1/2" PP 8x PVC Dosinghose 4 x 6 per meter 4x PVC Dosinghose 10 x 14 per meter 1x Twinjector 2x Filter PVC 4x6mm 2x Profec Ballvalve 1/2" in/out 1x Point piece and nipple 10x14 incl. O-ring 2x Stainless steel water/temp sensor PT100 incl 5 meter silicon cable 	€ 423,00
7043606	Standard	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. 2x Profec Ballvalve 1/2" in/out Level-specific components: Injection valves for dosing pumps and extended saddle clamp connections. 	€ 468,65
7043607	Premium	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. 2x Profec Ballvalve 1/2" in/out 2x Filter PVC 4x6mm Level-specific components: PVC T-pieces and reducers for professional pipe integration, including twin injector. 	€ 477,53
7043608	Pro	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. 2x Profec Ballvalve 1/2" in/out 2x Filter PVC 4x6mm Level-specific components: Extended PVC T-piece and reducer set with multiple injection valves for advanced installations. 	€ 586,74
7043609	Pro+	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. 2x Profec Ballvalve 1/2" in/out 2x Filter PVC 4x6mm 2x Filter PVC 4x6mm Level-specific components: Premium DELUXE injection valves and full professional pipe integration set. 	€ 647,61
7043610	Assemble kit Hydro/ Electro + pH Basic	<ul style="list-style-type: none"> 1x Norsup 5in1 Probeholder set 3x Saddleclamp 63x1/2" 4x PVC Dosinghose 4 x 6 per meter 4x PVC Dosinghose 10 x 14 per meter 1x Injectionventil for dosingpump 1/2" 4x6 1x Filter PVC 4x6mm 2x Profec Ballvalve 1/2" in/out 2x Point piece and nipple 10x14 incl. O-ring 2x Stainless steel water/temp sensor PT100 incl 5 meter silicon cable 	€ 408,18
7043611	Standard	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. Level-specific components: DELUXE injection valve for improved dosing accuracy. 	€ 438,61
7043612	Premium	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. Level-specific components: PVC T-pieces and reducers for advanced pipe integration. 	€ 517,07
7043613	Pro	<ul style="list-style-type: none"> Basic components included: 5-in-1 probe holder set, dosing hoses, filters, ball valves, connection fittings and PT100 water/temperature sensors. Level-specific components: DELUXE injection valve combined with professional pipe integration components. 	€ 547,50

STEP 4

ADDITIONAL OPTIONS

NorsupOne offers various additional options such as an automatic valve and TDS kits, allowing customers to elevate their pool experience even further.

Itemnr	Name	BOM	List price
7043614	Automatic valve		€ 1262,00
7043615	Water level sensor with cable 30m		€ 819,20
7043616	Water level sensor with cable 50m		€ 1246,83
7043617	Water level sensor with cable 100m		€ 1825,53
7043618	Suction plunger		€ 78,00
7043619	Electronic ball valve bottom suction 50/63cm		€ 512,00
7043620	TDS sensor kit T-piece 50mm/63mm	<ul style="list-style-type: none"> 1x Norsup TDS electrode (conductivity) S8 without cable 1x Electrodecable 57/58 5m black 1x Probeholder 1/2" 1x Profec T-Piece 63 x 1/2" in x 63 1x Profec PVC reducer 63 x 50 1x Norsup 3000 ppm calibration solution 50ml 	€ 423,06
7043621	TDS sensor kit tapping saddle 50 mm	<ul style="list-style-type: none"> 1x Norsup TDS electrode (conductivity) S8 without cable 1x Electrodecable 57/58 5m black 1x Probeholder 1/2" 1x Saddleclamp 50 x 1/2" PP 1x Norsup 3000 ppm calibration solution 50ml 	€ 384,14
7043622	TDS sensor kit tapping saddle 50 mm	<ul style="list-style-type: none"> 1x Norsup TDS electrode (conductivity) S8 without cable 1x Electrodecable 57/58 5m black 1x Probeholder 1/2" 1x Saddleclamp 63 x 1/2" PP 1x Norsup 3000 ppm calibration solution 50ml 	€ 376,62

bringing water to life

NEW!

PUT TOGETHER YOUR COMPLETE NORSUP WATER TREATMENT SYSTEM

DO YOU HAVE FURTHER QUESTIONS OR NEED ADDITIONAL SUPPORT FOR YOUR PROJECT?

Our Bevo sales team will be happy to assist you with expert advice and tailored solutions.

NEW!

PUT TOGETHER YOUR COMPLETE NORSUP WATER TREATMENT SYSTEM

With Norsup, you can put together your own complete water treatment system, based on customer's needs. From fully automated to environmentally and skin-friendly, anything is possible.

Expert advice for premium pool technology

As specialists in professional pool technology, we support our customers with in-depth expertise and personal advice. With a strong focus on our premium brand Norsup, we develop high-quality system solutions that combine reliability, performance and long-term efficiency.

Our pool technology expert supports you throughout the entire project process from technical planning and system configuration to installation and long-term operation ensuring that every solution is perfectly aligned with your requirements and the highest quality standards.

STEP 1 POOL AUTOMATION

NORSUPONE V3 CONTROL UNIT

ONE SYSTEM FOR COMPLETE SWIMMING POOL CONTROL

Discover the new NorsupOne V3, the smart all-in-one system that transforms any swimming pool into a fully automated experience. From water quality to lighting and heating, everything is controlled via a single intuitive interface. User-friendly, efficient and ready for the future.

For installers, the NorsupOne V3 means faster installation, less cabling and easy maintenance. Installers can also monitor all the swimming pools they have installed in the installer app, enabling them to carry out preventive maintenance.

Zero-E

The NorsupOne V3 can be connected to the smart meter of the home for insight into energy production and consumption, and automatic optimisation of the water temperature with own power generation. This makes the NorsupOne V3 an environmentally conscious choice.

- Up to 5 peristaltic pumps (e.g. chlorine, pH-, pH+, algicide, flocculant)
- Adjustable hysteresis for all 5 pumps
- Automatic backwash via electric 6-way valve, Besgo valves, or electric rod valve
- Automatic backwash via timer or Based on a high waterlevel (WLS sensor needed)
- Frost protection control with integrated air and water temperature sensors
- Level control via pressure sensor for overflow pools or skimmer pools With safetylock for poolcover
- Connectivity for all common variable-speed pumps (VS pumps)
- Modbus connectivity
- Connection via LAN, Wi-Fi or 4G (SIM card slot available)
- Free chlorine measurement available from 2026
- Suction lances with container empty switch
- Roller shutter control directly via integrated transformer
- Lighting control
- 4 AUX connections
- App access or web portal – for end customers and installers
- Solar control
- Zero-E concept, the systems knows that there is an overproduction of the solarpanales and will startup the heatpump

Itemnr	Name	BOM	List price
7043598	NorsupOne V3 controller	1x NorsupOne V3 controller	€ 5589,71

STEP 2 CHOOSE WATER TREATMENT

NORSUPONE PH/RX DOSING

AVAILABLE IN COMPACT AND MODULAR VERSIONS FOR VARIOUS INSTALLATION OPTIONS

In this configuration, the NorsupOne v3 is perfect for liquid chlorine and pH dosing. With chlorine dosing, liquid chlorine is automatically added to the pool water based on the measurements. The chlorine disinfects the water by killing bacteria, viruses and algae. For private pools with a water capacity of up to 200m³.

- **RELIABLE AND WELL-KNOWN SYSTEM:** easy to manage and highly predictable operation.
- **RAPID DISINFECTION:** immediately effective at varying loads (many swimmers).
- **EASY TO COMBINE:** works well with pH control and measurement and control systems.

NORSUPONE ELECTROLYSIS

During electrolysis, salt (NaCl) is dissolved in the pool water and converted into chlorine (sodium hypochlorite) via an electrolysis cell current. This chlorine performs the same disinfecting function, but without the addition of separate chemicals. For private pools with a water capacity of up to 110m³.

- **LESS STORAGE OF CHEMICALS:** safer and more environmentally friendly.
- **CONSTANT CHLORINE PRODUCTION:** more stable chlorine levels and fewer fluctuations.
- **SOFTER SWIMMING WATER:** more pleasant for skin, eyes and materials.

NORSUPONE HYDROLYSIS

Hydrolysis uses the electrical decomposition of water with a low salt content (approx. 1.5 g/l) to produce active oxygen and hydroxyl radicals. These oxidise contaminants and kill microorganisms, often in combination with a small amount of chlorine or copper ionisation. Suitable for private swimming pools with a water capacity of up to 120 m³.

- **VERY STRONG OXIDISING POWER:** also effectively removes organic contamination.
- **LITTLE OR NO CHLORINE ODOUR:** more comfortable indoor climate, ideal for indoor swimming pools.
- **ENVIRONMENTALLY FRIENDLY AND LOW MAINTENANCE:** less chemical consumption, fewer residues.

Itemnr	Name	BOM	List price
7043599	Water treatment kit pH + chlorine dosing compact	<ul style="list-style-type: none"> • 2x Norsup dosingpump 10RPM 1,4L@1,5Bar 230V black (build in) • 1x pH Glass probe, 120mm S8 connection (without cable) • 1x Rx Glass robe, 120mm S8 connection (without cable) • 2x Electrode cable 57/58 2 meter Black • 1x Buffer Liquid pH 4 50ml • 1x Buffer Liquid pH 7 50ml • 1x Buffer Liquid Rx 475mV 50ml 	€ 530,29
