

RGB & White led light

COLORLOGIC® / CRYSTALOGIC®

- **With a choice of eleven colours, you can choose between classic white lighting or else unique, festive atmospheres and obtain colour effects that significantly embellish your outdoor space**
- **Easy to use** – ColorLogic® II / III and CristaLogic® can replace a PAR 56 light bulb in a conventional 300W projector
- **Economical** – because of the technology they use LEDs use a lot less electricity than a conventional projector (about 6 times less)
- **Long service life** – thanks to their anodised aluminium body and glass lens they have exceptional longevity (lasting for about 30,000 hours) and are able to withstand the effects of time and corrosion caused by water treatment products
- **New ColorLogic® III and CristaLogic® III available for this season: new bulb that works either in 12 V alternating or in 20 V direct**

CrystalLogic®

Colorlogic® II / III

Complete coloured parts led lights ColorLogic III® / CristaLogic III® available in 4 colours: Dark grey, Grey, Sand and White
