

Melpool 90/20

Description	Use	Specifications
<p>Dosing instructions (practical advice):</p> <ul style="list-style-type: none"> • Always correct the pH value between 7.2 and 7.6 • Dissolve the tablet(s) in the dosing float or skimmer • Maintain the chlorine level around 2 to max. 5 ppm (mg/l). The dosage depends strongly on circumstances (temperature, sun and bath load) • 10 tablets per 30-35 m³ of water every 3-5 days • With this dosing recommendation, the cyanuric acid content may not exceed 70 ppm (mg/l) (overstabilisation) • May differ from label texts. Labels are always drawn up according to national rules and regulations <p>Warning:</p> <ul style="list-style-type: none"> • Use biocides safely. Always read the label and product information before use • Keep in a cool dark place, out of the reach of children • Do not throw the tablets directly into the pool. You can easily get bleach stains and damage the bottom of your pool. • Never mix with other (swimming pool) chemicals or other types of chlorine. These can react with each other. Chlorine gas formation may occur • To avoid risk of skin and eye irritation, it is recommended to wear protective gloves and eye
