SAFETY ADVICE

WARNING
Swimming pools can be a serious danger for your children. Drowning happens very quickly. Near a swimming pool, children require constant supervision and active vigilance even if they can swim. The physical presence of a responsible adult is essential when the swimming pool is uncovered.

- We cannot recommend strongly that parents learn life saving techniques.
- Memorise the emergency service phone numbers and display them near the pool:

European emergency number	112
Fire & Rescue	18
Ambulance	15

- A child can drown in less than three minutes. No protection of any kind can replace the watchfulness and vigilance of a responsible adult, which remains the essential factor in the protection of young children. This cover is not a substitute for common sense or personal liability.
- If a second safety system is not used, the cover must be systematically in place when there is no surveillance, however short that may be.
- The person in charge of operating the cover must make sure there is nobody and no objects in the pool and always keep the pool in full view during opening or closure operations. It is essential to fully open or close the cover, without ever leaving it in an intermediate position.
- Prevent from climbing onto, walking on or jumping on a safety cover.
- Always check that the pool water level remains constant and compliant with the use height (2/3 from the top of the skimmers) as recommended by the manufacturer.
- If the cover is altered or if a malfunction prevents the pool from being covered and secured, take all necessary steps to prevent young children from accessing the pool until the cover has been repaired.

WARNING
Be aware that safety is only assured with a closed, locked cover which is correctly installed in compliance with the manufacturer's instructions.

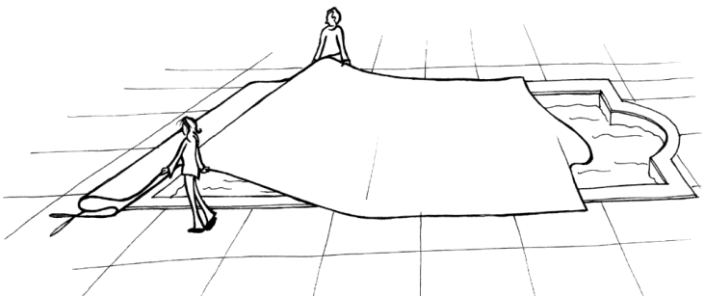

In order to comply with the NF P 90-308 standard, the cover installation must apply the following instructions

USE

1. Uncovering the pool

IMPORTANT
The pool cover must be opened by responsible adults following the instructions given below.

1.1 Unhook the bungees from around the cover except in the corners.
1.2. Unhook the springs on the opposite side to the storage and bring the cover back over the storage side coping by folding it in an accordion shape.

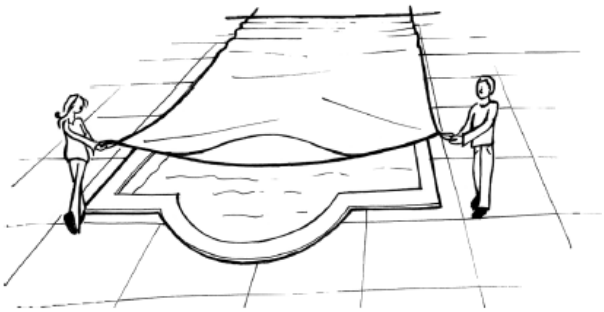

1.3. Once the cover has been brought onto the coping, unhook the remaining springs and fold the cover along the width. Move it away from the deck to limit the risks of accidental falls.

IMPORTANT
Always keep the pool in full view during opening and closure operations

1. Pool covers

French law imposes that pools be covered as soon as they are no longer in use. The cover must be unrolled after having checked that there are no bathers or foreign objects that could prevent the operation in the pool.

2.1. Place the cover near the pool and stretch it along the width.
2.2. Attach the corner springs to tension the cover.
2.3. 2 adults should each take one of the remaining corners, stretch the cover over the pool and fix the corner springs.

2.4. Fix all the springs along the lengths and widths.

WARNING
The cover is tested on the coping: If an alarm is fitted, you must make sure that all protuberances are eliminated when the cover is fitted.
Caution, safety is only provided by a closed, locked cover which is properly installed in compliance with our instructions.
This cover is not a substitute for common sense or personal liability. It does not aim to replace the vigilance of parents and/or responsible adults, which remains the essential factor in the protection of young children.
This cover should never be considered to be a walking area: as a result never intentionally climb onto, walk on or jump on the safety cover!

CARE & MAINTENANCE

1. Care

You should clean the cover at least once per year (preferably after winterisation), using a specific cleaning product for PVC fabric. Routine cleaning is basic cleaning using a hose. Always avoid aggressive or foaming products, solvents and abrasive sponges.

2. Maintenance

The entire cover and fixing elements should be inspected at least once per year (for example when the cover is cleaned).
Additional checks are required if the safety function of the cover has been used, or after a period in which it may have been subjected to extreme conditions (storms, heavy snow, etc.).
Following these various checks, it is essential to change all damaged parts and not hesitate to immediately replace any component that has any defects or signs of wear. When in doubt, contact a pool professional.
All spare parts must be manufactured by ALBIGÈS in order to maintain the original cover specifications.

IMPORTANT
If the cover is altered or if a malfunction prevents the pool from being covered and secured, take all necessary steps to prevent young children from accessing the pool until the cover has been repaired.

2. Special specifications during winter

SKIN EXTREM® will give full satisfaction when used in winter subject to following the rules given below:
3.1. The pool water level must imperatively be kept at use height (2/3 over the skimmers), make sure the water does not overflow and pass behind the liner (use of an overflow) and make sure that embedded parts and piping do not freeze (use of gizzmos, suitable caps and a line of winterisation floaters).
3.2. Maintaining the water level allows the cover to be supported by the water in the event of heavy precipitation. In excess of 10 cm of snow, the snow must be cleared from the cover. Similarly, remove all impurities that could obstruct the drainage mesh.

IMPORTANT NOTE
Failing to maintain the water level will void the warranty on the SKIN EXTREM® cover.

GUARANTEE

IMPORTANT
The SKIN EXTREM® covers have a 3 year guarantee for normal use.
Abrasion and wear caused by rubbing on the coping is not covered by the guarantee.

1. Use and warranty conditions

1.1. As SKIN EXTREM® covers are made to measure, we cannot be held liable for any errors in the dimensions or colours communicated by the customer.
1.2. SKIN EXTREM® covers must be installed and used according to the contents of this manual.
1.3. All complaints must be sent by registered letter with acknowledgement of receipt and the equipment in question made available to our experts or to those of our insurance companies for expertise. No SKIN

EXTREM® covers can be returned without our prior permission and must be accompanied by a filled in "Return form" (exact reason for the return).

1.4. The after sales service is provided by your pool dealer.

1.5. Parts will only be replaced once the defective part has been received.

2. The guarantee is not applicable to:

2.1. Incorrect assembly, failure to follow the installation instructions and the resulting damage.

2.2. Incorrect operation or abnormal use and the resulting damage.

2.3. The normal wear of cover components.

2.4. Wear and damage caused by abnormal friction.

2.5. Wear from abrasion on rough, abrasive or curved coping.

2.6 Snow overload (maximum 10 cm).

2.7. High and very high winds.

2.8. Damage due to transport.

2.9. Cleaning using products other than those that are recommended (see maintenance and care instructions).

2.10. Use of non-original spare parts..

IMPORTANT
All covers that have not been fixed in strict compliance with the installation manual will not be covered by the guarantee.

NOTE
This guarantee only covers the replacement of parts or units that are acknowledged to be defective, and excludes any liability, compensation or transport costs for any reason whatsoever.
This guarantee only applies after full payment of the invoice for the product in question.
All covers for which there is a disagreement must be returned carriage paid, with our permission, for expertise.

Warning:
The product's compliance with the standard depends on respecting the anchoring system tension and therefore complying with the anchoring system measurements.
